

CHAPTER I

INTRODUCTION

A. Rationale

There are many various kinds of tribes and nation in the world with their own language as mean of communication among them. By using that language enables them to interest each other. Even to express their feelings, thought and ideas. One of those languages and it also used to learn sciences and technologies. There for it is important to learn it. To achieve educational goal, we have to learn, including learning language. Learning language is one of many conditions that can make a nation develops rapidly.

“Language is the system of sound and words used by human o express their thoughts and feelings.¹ Human beings are social creatures that can not live alone. To interact with the others, they need a language. The need of language is felt when they want to tell some information or messages and to express their feeling, thought, and ideas the others.

Murcia and Lois state: “Te essence of language is human activity, activity on the part of one individual to make him self understood by another, and activity on the part of the other to understand what was on the main of the first”.²

There are many various tribes and nation in the world with their own languages that they use as a mean of communication between them. So, to communicate easily with the others. It is very important to learn the other languages in order to make the same understanding. It is related to the Holy Koran: (Ar Rum: 22)³:

إِنَّ وَالْوَانِكُمْ أَلْسِنَتِكُمْ وَاختِلَافُ وَالْأَرْضِ السَّمَاوَاتِ خَلَقُ آيَاتِهِ وَمِنْ (الروم: ٢٢) لِلْعَالَمِينَ لآيَاتٍ ذَلِكَ فِي

From that verse, we know that Allah created various languages in order to be learned. From a lot of language that belong to separate of nations, English is one of world languages that is very important to learn. It has a very essential position in communication among people. The use of English widely considered as an urgent need. English is used as an international language. It becomes the main communication device in the field of science and technology. Furthermore, it is now widely spoken by so many people in the world.

We are, we need it very much to communicate or to interact with the others. It is related to the Holy Koran: (Al-Hujarat: 13)⁴

وَقَبَائِلَ شُعُوبًا وَجَعَلْنَاكُمْ وَأَنْتَى ذَكَرٍ مِنْ خَلْقِنَاكُمْ إِنَّا النَّاسُ أَيُّهَا يَا (الحجرات) خَيْرٌ عَلِيمٌ اللَّهُ إِنَّ أُنْفَاكُمْ اللَّهُ عِنْدَ أَكْرَمَكُمْ إِنَّ لِنَعَارِفُوا (١٣)

⁴ *Ibid*

From the verse above, we could understand that as Moslems, we are asked to know each other, and for it we need a language.

Language is a uniquely human activity. It is often characterized as “species specific”, i.e., it is an instrument possessed only by man. All normal people in the world can speak. No group of people without a spoken language as ever been discovered. Language is universal. All normal human beings in community understand and speak well enough to carry out every activity of human life.⁵

English is a foreign language in Indonesia. Because the important of English, the government made it as a component of nation education that implicated to be an obligated subject either in Islamic Junior High School, Islamic Senior High School, or in University. Moreover, today English is one of the subjects that become the requirement for student’s graduation in Islamic Junior High School and Islamic Senior High School.

In learning English, we have many problems because it is not our own language. We often make errors in English. So in order to make as less mistakes as possible, it is important to learn all the rules that govern English. We have tried to point out the blunders commonly made by people and way to correct those blunders.

There are so many common errors in English such as mistakes while using verbs, tenses that confuse, mistakes while using, adjective, problems with plurals, pronouns, spelling adverb etc.⁶

In this research, the writer like to study about common errors in English, especially errors in using verb because verb is one of the important element to

build a sentence, every sentence must have a verb. Beside that verbs are the driving force of the language. It is no accident that most grammar books begin with verb. When you can use verb well, much of the other grammar you use, seems to happen more easily. Verb in English is also more complex than Indonesian. Verb in English has to agree with the subject both in person and number, verb in English also depend on the situation and tense because in English all verb show tense and as we know in Indonesian language we don't have tenses as such, and simplified method of talking about different point in time is often attempted in English because in system of Indonesian grammar, verb forms are more limited than English. For example, Indonesian language only has one word of "pergi", but in English has word go, goes. Went, gone or going which have the same meaning with the word pergi in Indonesian language, but the use of verb in English are more difficult to study than verb in Indonesian language, the consequent is there are many errors that made by the people who learn English. Therefore the writer thinks learning error in using verb are very important to study things that must be discussed in this part.

Learning using verb correctly one aspect of grammar. Today, it is one problems faced by student in mastering English. Based on the writer's observation, the second grade student at Islamic Senior High School Siti Mariam Banjarmasin have knowledge about English such as vocabulary, and grammar.
